PROFESSIONAL SUMMARY

Technical Writer with 2.8 years of experience at a B2B SaaS Digital Adoption Platform, owning end-to-end documentation across 7+ product pods. Drives feature adoption and reduces support load through customer research, analytics, and task-focused documentation. Built automation systems to maintain 500+ articles at scale and contributed directly to product OKRs through fast, data-driven execution. Promoted twice within two years.

SKILLS

Documentation: User Guides, Release Notes, FAQs, Troubleshooting Guides, In-App Guidance (DAP), UX Writing, Information Architecture, Content Strategy, Style Guides, DITA, API Documentation (actively upskilling)
Tools: Document360, Confluence, Jira, Whatfix (Digital Adoption Platform), Camtasia, Snagit, Synthesia, Figma, Canva, Draw.io, GitHub, HTML, CSS, Markdown, VS Code
Automation and Technical: Python, Google Apps Script, Jira API, Whatfix DAP Content (Flows, Smart Tips, Launchers, Surveys), Automated Reporting Scripts
Analytics and Research: Whatfix Analytics, CallAI/Chorus, Zendesk, Usability Testing, Customer Call Analysis, Support Ticket Research
Collaboration: Cross-functional (PM, Engineering, UX, CSM), Agile/Scrum, Peer Review, Release Management, Mentorship, Localization

WORK EXPERIENCE

Whatfix | B2B SaaS Digital Adoption Platform | Bangalore, India *Jul 2023 - Present*

Promoted twice within two years: Intern (Jul 2023) > ID I (Jan 2024) > ID II (Mar 2025)

Information Developer II *Mar 2025 - Present*

Pods: Workflow Engine, Seek, Self Help, App Engine, Labs Assistant

- Delivered documentation and OKRs across **3+ pods per release cycle**, maintaining a zero-escalation record across 20+ releases.
- Surfaced historical Whatfix auto-capture analytics same-day, enabling a PM to **close a Q1 OKR on schedule** and removing a full month of instrumentation wait.
- Built 6+ automation scripts (Python, Google Apps Script, Jira API) eliminating manual audits across **500+ articles**, saving ~1 hour/week per workflow.
- Maintained **1–3 day turnaround** on WSC tickets; proactively raised **100+ Jira tickets independently.**
- Led usability testing with Digital Adoption Consultants; deployed a Whatfix Launcher on the support site, resulting in **100+ responses on feature feedback initiatives**.
- Produced **40+ customer-facing videos** and community use-case posts; Seek for Salesforce demo videos amplified on LinkedIn by company leadership.
- Audited UX copy across 7+ pods and co-authored updated UX writing guidelines with the UX writer.
- Presented Writer-Led Innovation for Tool Limitations at an external technical writing event; received appreciation from senior technical writers across the industry.
- Acted as first-line bug investigator, reproducing issues before engineering involvement.
- Mentored 2 interns through onboarding, KT sessions, and independent ramp-up.

Information Developer I *Jan 2024 - Mar 2025*

Pods: Studio (Guidance), App Engine, Workflow Engine, CAP

- Maintained **1–3 day turnaround** on WSC tickets; proactively raised **100+ Jira tickets independently.**
- Attended customer and product calls with PMs, designers, and DACs to gather feedback and improve content usability.
- Created and deployed multiple DAP content using **Whatfix DAP content** to reduce manual processes and support feature adoption.
- Reviewed and maintained **200+ support articles and 200+ Confluence articles** (English and German) per review cycle.
- Maintained WSC ticket turnaround of **1 to 3 days**; raised and resolved 50%+ of tickets independently before escalation.
- Served as **early-access tester**, contributing bugs and UX feedback adopted in releases.
- Completed LinkedIn Learning courses to upskill; contributed to team-wide tasks and process improvements.

Information Developer Intern *Jul 2023 - Jan 2024*

Pod: Studio (Guidance)

- Took full ownership of Studio pod within the first month, authoring release articles, FAQs, troubleshooting guides, demo videos, feature walkthroughs, DAP content, and onboarding content for **Writing Assistant, Visual Editor, and Autocomplete**.
- Created community posts and product tips; peer-reviewed **157 support articles** and scored 95% on the Whatfix product knowledge assessment.
- Completed LinkedIn Learning courses to upskill; contributed to team tasks throughout the internship.
- Devised a Synthesia and Loom audio-sync workflow that bypassed audio generation limits, reducing video production time and cost.

QSpiders Campus Connect *Sep 2022 - Feb 2023*

Software Engineer Trainee (Internship)

- Trained on Java, SQL, and web development fundamentals; built web pages using HTML5, CSS3, and JavaScript.

Equinox Technologies *Jun 2021 - Oct 2021*

Software Developer Intern

- Developed a user-friendly antivirus application using HTML5, CSS3, and JavaScript; tested and debugged web applications to ensure optimal performance.
- Trained on Java, SQL, and web technologies; collaborated with the team on development tasks.

PROJECTS

Diagnostics Feature — End-to-End Documentation | Document360, Whatfix, Camtasia, Snagit, Confluence *2025*

- Structured documentation around real debugging workflows after hands-on testing.
- Result: **Strong adoption and PM recognition for customer-centric approach**.

UX Writing Audit and Product-wide Guidelines | UX Writing, Cross-functional *2025*

- Standardized terminology across **7+ pods** through full product audit by collaborating with the UX writer.
- Result: Established **single source of truth for UX copy**.

Documentation Health Automation Suite | Python, Google Apps Script, Jira API *2024-25*

- Built automation suite: broken-link checker, article-age tracker, Jira ticket reporter, release reminder emailer, and duplicate media detector.
- Result: Eliminated manual audits across **500+ articles - saving ~1 hour/week per workflow.**

Usability Testing and Feature Adoption Project | Whatfix Analytics, DAP, Research *2024*

- Led usability testing with DACs to investigate low adoption; deployed a Whatfix Launcher on the support site surfacing real-world use cases.
- Result: **100+ feedback responses + improved feature usage.**

AWARDS AND RECOGNITION

- Above and Beyond Badge (ID II): Recognised for consistent on-time delivery across high-pressure releases.
- Hustler Badge (ID I): Recognised for continuous self-improvement and raising output quality.
- 2x Spot Award: High-impact delivery under pressure; creative use-case showcase at the Monday team call.
- 3x Cheers Mate Shoutout: Innovation, GTM delivery, enterprise success
- PM and Leadership Appreciation: Seek for Salesforce GTM videos on LinkedIn; Q1 OKR analytics same-day; Documentation quality.

EDUCATION

B.E., Computer Science and Engineering | Vijaya Vittala Institute of Technology, Bangalore *2018 - 2022*

First Class with Distinction | 7.6 CGPA
